

## **Opportunities with Wildlife Conservation Society-India Program and Centre for Wildlife Studies – Bangalore**

We have some exciting opportunities to work in our ongoing and new field research programmes in different parts of India. The scope of the project will broadly involve monitoring the distribution and abundance of prey-predator populations.

We are looking for young and highly motivated individuals capable of carrying out field research work independently under the overall supervision and guidance of our Senior Program Staff. The aspiring candidates must be physically fit and willing to put long and arduous working hours in the field. The position will require investing substantial amount of time in the field at a stretch (6 - 8 months) and will be responsible for the successful and timely implementation of projects at different field sites. Preference will be given to candidates with driving skills and prior field experience.

Remuneration is in commensurate with qualification and experience. A bachelor degree in any discipline is desirable, although we encourage all candidates with a proven track record of interest in wildlife, to apply for this position irrespective of their education background and qualification.

If you are interested in further exploring this opportunity, please write to Anitha <[anitha@wcsindia.org](mailto:anitha@wcsindia.org)> immediately with your resume and other relevant details.

**Those who have already applied and appeared for the interview during past two years need NOT apply.**
